

HostMonster has been in the industry for over 10 years and has lots of awards they had won from several top web hosting review companies to show for their quality hosting services. I am writing this not because I have seen them but for the fact that I have used their services for close to 36 months now. They have a one-size-fits all hosting plan that practically contains all you may need to set up a quality site and it lightens the mind more when all these are at a cost of a plate of cheap food.

We are going to look at least 6 qualities that has endeared HostMonster to numerous customers and made them famous in the hosting industry over the years.

Features

HostMonster may only have one hosting plan, but it's certainly not short of features, the entire list can be found on their website here . Below is our overview of the main features you should know about.

- 300GB Disk Space - This should be enough to satisfy even the most storage hungry of websites.
- 3000GB/month Bandwidth - Well, HostMonster are definitely living up to their name, because this really is a monstrous amount of data transfer. - The majority of websites won't even use 1% of that, and it's a good job they don't, because if they did all HostMonster's servers would go into meltdown!

- Unlimited Add- on domains - This, in our opinion, is the key selling point of this plan. No other host company (who is genuine and trustworthy) offers such a feature, at such a low price. It allows us to host an unlimited number of websites on a single account at no extra cost, thus delivering exceptional value for money.
- Free domain name - HostMonster will register your domain name for you free of charge, for as long as you host with them.
- Fantastico - This program can install over 50 useful scripts automatically. Its functionality is integrated into your control panel, and offers the easiest way to install scripts such as blogs, shopping carts, forums, portals, galleries, and more.
- 100 MySQL Databases - These come in very useful when installing Fantastico scripts, because each script will often require its own database.
- Free site builder software - Contains professional templates, and presents you with the easiest way to create a new website.
- 30 Day money back guarantee.
- Free search engine submission.
- 99.9% Uptime guarantee.
- Unlimited e- mail accounts.

HostMonster is very reliable

They promise an up time of 99.9% but some third party monitoring data site has recorded that this hosting services company gives more than they actually promise. Their actual up time period has been independently put at 99.95%. This is one good advantage they have over so many other hosting companies.

All-in-one and affordable hosting package

HostMonster.com is reputed to have just one all-inclusive hosting plan. Everything you will need to get your web site running is included in this single package. That you can use unlimited disk space, host unlimited domain, with unlimited monthly transfer may be considered a normal feature of some other hosting sites but it is astounding to note that HostMonster pre-installs almost all the popular website scripts such as Joomla, WordPress etc for you. If you are looking for a web solution for your big or small business concern, HostMonster has adequate e-commerce features that will suite your needs.

It Connects Fast

It is a well known fact that HostMonster comes with a stable and very fast connection. Its entire account package usually come with backup generator, mirrored storage backup and Custom made Apache system server application. Also included in every accounts are high-performance in setup as well as with an Quad Opteron servers with UPS back ups and OC-48 backbone connection. They also have a professional security staff that monitors the data backup center which is where your hardware is stored. This is a 24/7, round the clock monitoring.

Perfect Customer Service

With a combination of Live Chat support, toll free call support, online knowledge base and email support, HostMonster is one of the few hosting companies that has real time prompt help to any issue you may have as a customer. Their Live Chat support is so prompt and responsive that you may not even need any other route to lay your complain or ask question because you just chat with any of their agents and immediately get your issues clarified.

HostMonster is safe

HostMonster has a very good world-class back up plan in place that guarantees the safety of your data. They also offer you money back guarantee. This simply means that if you are not satisfied with their services within 30 days, you can ask for your money and have it without hassles.

Global Recognition

HostMonster has been awarded the best hosting company by some web hosting reviews sites. Their services have been testified to be excellent by their numerous customers. One of their very strong points is their ability to maintain good relationship with their customer out of a dedicated passion for good service delivery.

Conclusion

HostMonster have done a great job with this "all things to all people" type plan. In fact we were ready to condemn them for being just another host who make promises that they have no intention of delivering on. Thankfully our investigation has found them to be a genuine and worthy host, who do indeed represent a sensible hosting choice for a wide variety of potential customers. Principally, those of you who are seeking budget shared hosting, but still want vast amounts of features, coupled with excellent value for money. This is especially the case if you plan on hosting multiple websites; our favorite host for this purpose is Hostgator (they also offer unlimited domains), but they do charge a few extra dollars per month. So if you're in the market for a similar solution to that which Hostgator offers, but can't stretch to \$9.95/month, then HostMonster would make an admirable choice. Their plan is available in two formats 12 or 24 months, the cost of which works out at \$6.95, and \$4.95 per month respectively. HostMonster undoubtedly present us with a great value web hosting solution, which in our opinion makes them a very sensible choice.
